

**GIVE RIGHT
FOUNDATION**

Volunteering with Your Family and your Friends!

Togo (West Africa)

December 26-January 27

Dates: Year-round (start dates arranged with our staff)

Do you have friends or family who are health professionals, students, social workers, or community leaders seeking a unique and meaningful bonding experience? The Give Right Foundation offers an incredible opportunity to engage in a Medical Family Service Trip to Togo, where skills and compassion collide to make a profound difference.

Imagine immersing yourself in a new culture while providing essential support to communities in need. Our Medical Family Service Trips do not involve surgery or childbirth but focus on shadowing physicians in clinics and hospitals, assisting with various tasks, and teaching valuable skills. From distributing equipment to teaching ultrasound techniques to midwives and nurses, your involvement will be invaluable.

Your journey begins in the vibrant capital city of Lome, where you will spend two days exploring and connecting with the local people. Following this, you will travel to the Kpalime/Plateaux Region, just an hour and a half drive, where the heart of your community service work will take place.

This 9-day medical community service project in Togo is more than just a volunteer opportunity—it's a chance to expand your worldview and create memories. You will live, learn, and work in southern Togo, participating in activities that will leave a lasting impression on you and the community you serve.

The Give Right Foundation is here to guide you every step of the way in this extraordinary adventure.

Join us in this transformative experience and make a tangible difference while forging deeper connections with your loved ones. The Give Right Foundation is here to guide you every step of the way in this extraordinary adventure.
